A continuación, se muestra un ejemplo de cómo se pueden iterar las facturas recuperadas:

JavaC#PHPPythonRubyPerl

```
// Iterates over all invoices retrieved and prints their information.
for (Invoice invoice : response.getInvoicesList()) {
    System.out.printf(
        "- Found the invoice '%s':\n"
        + "   ID (also known as Invoice Number): '%s'\n"
    );
}
```
